

**TRUE QUALITY
HAS NO FEAR OF TIME!**

TRUE QUALITY HAS NO FEAR OF TIME!

Since establishing our company in 2006, our aim has been to create exceptional lighting by merging Danish traditions of craftsmanship and quality with a design approach that draws inspiration from a range of aesthetic traditions that have stood the test of time. With this guiding philosophy we have developed an extensive collection of indoor and outdoor lamps to deliver on your vision – whether you want to bring comfort and intimacy to a space, make a bold statement or simply add a touch of style with a beautifully crafted object. Additionally, we hope to inspire you with our broad choice of colours, ranging from calm and soothing to vibrant and energising shades.

Handmade in Denmark

As a Danish family-owned company, we take pride in supporting local craftsmanship and maintaining traditional manufacturing techniques, using the finest materials to ensure durability as well as a refined and unique expression.

All of our products are handmade in Denmark by skilled craftsmen and assembled by hand at our own facility. 95% of the parts used in our lamps are produced in Denmark and when we cannot find what we need on the Danish market, we source from within the EU. Having a high level of control of our supply chain means that we are able to ensure the uncompromising quality, fast delivery and flexibility that our clients expect. Producing locally also allows us to reduce our carbon footprint considerably!

As an additional service we are able to offer customised colours for larger orders and also develop tailor-made design solutions and concepts for our customers.

Our collection of handmade lamps is continuously expanding, as we are constantly exploring new shapes, forms, perspectives and possibilities. Our philosophy will however always remain unchanged – to bring to life timeless evergreens of uncompromising quality that are made to endure.

All handmade
IN DENMARK

ARCHITECTS INFO PAGE

We are able to offer you customised colours for small quantities

Our lamps are carefully hand-painted with a very strong anti-UV-coating and wet-paint, and are specially designed to resist the tough danish weather

(lots of rain, snow, wind and salt water).

All our lamps have CE Certification authorised and approved by CE representative

All outdoor lamps have IPX3 Certification

All our lamps are class-II lightings

All models can be downloaded directly from our website in either 2D or 3D format

High resolution

Pack shots

Data sheets

All our lamps are 100% made by hand in Denmark and assembled at our own facility, to ensure high quality and speed of delivery

- Oh, and by the way.. we have never missed any deadline!
